THE STORKS OF ALSACE.

Disappearance of the Bird of

Every year the number of storks to be seen in Alsace becomes less. Of the four nests perched on the big chimneys of the old roofs of Strasburg, only one has been occupied this year. In many of the villages the great migrators have ceased for a long time to relieve the landscape, and it seems ouly a question of time when the stork in Alsace will only be a memory. Various are the causes assigned for this desertion-" the draining of the marshes, the multiplica-

tion of telephone and telegraph wires, and

the smoke from factory chimneys. In Germany, for the better study of storks" there has been created a sort of service in connection with the Education Department which tends to set up an " etat civil" for each bird, or in other words, to register them after the manner which obtains for citizens in France. Each bird is captured where, possible, and a metallic disc affixed to its leg, and German officials, wherever the birds are believed to migrate, have instructions to send to the department any information they can gather concerning storks who are German subjects. (Possibly th's labelling may have something to do with the scarcity). By this system of registration the authorities have learned something of the migratory habits of the bird : for instance, one was found dead at the Cape of Good Hope whose place of origin was Eastern Prussis.

CAUS S. OF SCARCITY. A point of interest relative to the precity of the stork has been brought under the notice of the German authorities by a doctor at Port Elizabeth, who suggests that they have been poisoned through eating grasshoppers or locusts which have been killed by amenic. A correspondent, however, of an Aleace-Lormine journal hints that the cause is to be found nearer at home. He suggests that the storks, failing to get their patural food, are not shove destroying young game, and that the game preservers have deliberately shot the

No provision whatever is made for Mrs. Ava. 595 Willing Astor, Colonel Astor's dirst wife, who divorced him, and is mother of his children, Vincent and Muriel. The first Mrs tstor is not even mentioned in the

Mr Vincent Astor, the 20 year old son, gets the famous Rhinebeck and Newport estatus, the yachts, and other personal property, a residuary interest in the trust fu 'ds, and the rest of the estate not otherwise bequeathed. The total is estimated at £18,000,000. Colonel Astor's daughter the principal. The posthumous heir who and then the principal.

The trustees are to decide how much of the income from these trust funds shill be expended upon the beneficiaries until they are of agea :

The will was expented on Sept. 18th last, only nine days after the colonel married Miss Force. Colonel Astor's brother inlaw, Mr James Roosevelt Roosevelt, his friends, Mr Douglas Robincon and Mr Nicholas Fiddle, and his son, Mr Vincent Astor (on attaining his majority next November), are named as executors and trustees of the several funds.

Minor bequests to his trustees and others include sums of £4,'00 to his secretary, Walliam Bobbyn, "in" recognition of his faithful service;" and £5,000 to his steward. Thomas Hade, "in appreciation of many years of devoted service."

Mr Vincent Astor-I quote from the New York papers--"is now the greatest matrimonial match in the world, and, with the exception of his cousin. Mr William Waldorf Astor, the is also the greatest landlord in New York."

oMrs Madeleine Force Astor may do what she pleases with the £20,000 left to her unconditionally, as also with the sumsettled on her by Colonel Astor at her marriage. What that sum was has never been made public. Gossip placed it any- the opening of new: premises, referred to is surprised to learn that the beautiful may again return to fashion. The island has an area of 45,000 acres, the sheep being mostly of the Lincoln Merino cross, which do well on the pasture, although the cold has been responsible for heavy mort dity among the lambs. The main attraction of the syndicate, however, is the whales, which are very plentiful round the island. In one month last year eight whales were enptured without an accident, though the whaling equipment is only a launch and whaleboat. This year the whales are larger than usual, the bone being about 7ft. 6in. long, and the syndicate pays no attention to any but "right" whales, the value of which lie in their teeth. On an average there are "434 teeth in" the upper jaw of the whale, and these are worth from £1,000 to £1,500 per ton. About a dozen whales are caught every year.

### FLYING THE ATLANTIC.

Attempt to be made this Year.

Four men well known in the flying world have determined to attempt the gigantic feat of crossing the Atlantic in the air Their names are Messrs James V. Martin, Melvin Vaniman, Harry N. Atwood and is Dr Paul F. Gane, a millionaire friend of according to present arrangements will embark at St. John's, Newfoundland, and take a direct line to the headlands of Ireland, a distance of 2,450 miles. Vani man intends flying from west to east embarking at Atlantic City in the United States. He proposes steering a course over the open sea, being of opinion that he will then obtain most "advantage from any favourable wind he may encounter. Dr Gans' starting point will be near Teneriffe and after passing Barbadoes he intends to land, if possible, at Florida The route the doctor has chosen is almost indentical with that chosen by Christopher Columbus. He is to make the first at tempt. According to "Science Siftings" his machine will be elliptical in shape, 162

feet long by 49 broad, which will have suspended from it a boat 28 feet long by 7 wide, shapped like a submarine, and fitted with two motors of 110-horse-power each.

His crew will be Captain Joerdens as pilot. Dr Alt, meteorologist, a German naval officers yet to be chosen, an engineer Mr Atwood will employ a hydro

aeroplane, which it is said will a device that will make it easier to handle than any machine now extant. His commissariat, consisting of hot drinks in thermos flasks and food in tablet form, does not sound inviting however. "On the other hand Mr Vaniman apparently believes in providing for the inner man from the following description of the car- "Melvin" Vaniman's air car, which was contructed under his immediate direction. the most capacious gas bag and largest dirigible ever built in America. It is called the Akron. The balloon envelope has seven thicknesses, four of rubber and three of cloth, and is impervious to moisture. It is 258 feet long by 47 in diameter, and weighs, ready for flight. 26,000 pounds. The gas chamber will contain 400,000 cubic feet of hydrogen gas. The car has light tube frame work and will support four engines which will develop of French walnut, set three on a side. The gasoline reservoir holds 1,700 gallons. Suspended from the great gas bag by a swivel device is a non-capsizable, nonsinkable lifeboat 27 feet long, provided with storage room for a fifteen-day store of

provisions and a wireless apparatus of Lands, Hotels and Buildings:-Hongkong 500 miles. The ballon, which is capable hydroelevator of Vaniman's design, which gives to the monster airship, the has a maximum speed of thirty miles an hour, which, with the added speed of the

Mr. Martin, who hopes to compete for this prize under the auspices of the Royal Aero Club of England, intends flying as the crow flies. His machine will be of the hydroplane order and made according to his own ideas. When interviewed by "Sciences Siftings" he gave it as his opinion that no feat of engineering presents as many difficulties as the problem of building a machine to cross the Atlantic with success. On the other hand, should the feat be accomplished it would probably mean reducing by half the present fastest at 823, Dairy Farms at \$22, and Ropes at time of transit on record, and to army and 2193. There are buyers of Steam Laundrys and navy men the world over the possibi-

A veteran of the Indian Army has passed away in General L. W. Buck. The General who died at Bath, received his commission seventy years ago. He took part in the war with China in 1857-1858, and was present at the capture of Canton. During the tenure of his command at Hyderabad he suppressed the raids on the Burniese frontier, and for his services was mentioned in dispatches and thanked by the Government of India.

Earl Grey, the President, was to preside at the annual dinner of the Royal Colonial Institute fixed for May 17. Among those who were expected to be present were :-Lord Emmott, Viscount Milner, Mr Hobhouse, M.P., Sir John Anderson, Sir Reginald Antrobus, Sir Arthur N. Birch, Sir Godfrey Lagden, Sir E. Montague Nelson, Sir Walter Egerton, (Governor of British Guiana), Sir Frederick Lugard (Governor of Nigeria), and the High Commissioners and Agents-General for the

### ITEMS FROM THE COURTS.

At the Magistracy this morning the two men who were remanded earlier in the week in connection with a dumping case in which a body was taken from outside a police station to the Dispensary by a coolie, who there received the customary reward of a dollar, were brought up and discharged.

A fine of \$250 with the alternative of three month's imprisonment was imposed upon two fishermen and a woman for being in unlawful possession of arms. Men from the Harbour Master's launch boarded the defendants' fishing junk and saw the woman throw overboard six Mauser revolvers. She also bit with her teeth line at the sea end of which were the butte belonging to the revolvers and a number o ting which had evidently contained morphia. These were recovered from the bed of the harbour by the police.

In Mr Melbourne's court a youth was charged with uttering sixteen counterfeit

RAMBLING NOTES.

The Military Parido at the Hongkong C.C. ground was not only an appropriate function in celebration of His Majesty's birthday, but it was one which gave us an opportunity of again seeing how smart are our gallant military defenders. They looked spick and span, and every Briton must have rejoiced to see Ganeral Anderson, his staff, and officers non-commissioned officers and men gaged in the military maneuves with a precision and stondiness that betoken days. well for the kind of military men Britain relies upon in her time of need.

It was, however, a most unconscionable hour at which the Purade was held, 7.30 a.m.! which doubtless found more in the land-of-dreams-than-at-the-Hongkong-C.C. ground. Still, there was a very large crowd present, and, as I have said. British hearts thrilled with pleasure a the smart appearance of our soldiers.

His Excellency, Hon. Mr., Claud Severn, the Officer Administering Government, was present and received the salute as the troops marched past, Afterwards, His Excellency paid a high and well-merited compliment to the ap pearance of the troops.

In the evening I, along with many others, rambled to the Reception At Government House, where all were kindly welcomed to most enjoyable proceedings, greatly enlivened by the delightful music of the Yorkshire's fine band. "

Our new Governor is now on his way to Hongkong, as I observe in my " China Mail " that Sir Henry May had arrived at Sydney en route to Hongkong.

His energetic predecessor, Sir Francis Lugard, I note, never misser an opportunity of telling a London audience of the solid greatness and the future eminence of his beloved Colony of Hongkong, | give it to you. We don't sell it locally. which will apparently long be remembered by Sir Francis and Sir Francis by it.

Last week he gave us a purchase price. good sound scorching without the slightest drop of rain-or practically none-while this week he has frequently caused Old Sol to hide his benign countenance away, while the floodgates have been opened with a vengeance.

The rainy weather, besides being immediately responsible for some not very serious laudslides, was harmful to our shipping, and, at the docks, considerable difficulty was experienced in having the work of scraping and painting properly attended to.

The launches, I am told, are more in evidence than ever with merry bathing parties to Stonecutters' Island and elsewhere, and the aquatic season may now be said to be fairly under weigh.

Hongkong's "finest site," situated as all know, immediately in front of the Hongkong Club, is still a disgrace from every point of view, and I sigh as I pass it on my rambles to and from our classic club along our equally classic square. The Works' Committee are certainly not to be commended upon allowing the Chinese contractors or whoever they are at present in possession to remain there for so unconsciously long a time, no matter upon what business they may be engaged. It is preposterous that this-the finest, or the funniest-the latter it certainly is just now-site should be allowed to remain in its present unsightly condition. No pun is intended-Rambler is too deeply grieved over this ruestion f

I note, as many others doubtless have noted with equal interest, that Legislative, Council were seriously considering steps to frame an Ordinance with the view of possible early introduction of the scroplane in the Colony. the flying machine is more and more likely to be used as a valuable adjunct in everyday affairs is everywhere being recognised-in Hongkong as elsewhere. That will be "the" first step," I from 28th ulto. Sergte H. W. Sayer is imagine, after which a trip to Canton, permitted to resign on leaving the Colony Macso or even to Shanghai will be a mere latermittent supply by Rider Mains in matter of a few minutes' consideration. Suitable regulations will, of course, have to be framed, as it cannot be forgotten that Hongkong is a great fort as well as great scaport.

Yes, activity is evident, to put the idea in a more classic form, and the authorities are announcing that as the syllabus is now made up, all intending students should make the necessary inquiries so as to be ready for the equally. nocessary matriculation examination. Bir Charles Eliot, the Principal, is on his way. I am told, and with his arrival the forthcoming first session of the University of Hongkong will receive a fresh impetus and be set forth on honourable career, From all, every where, who are interested in Britain's most Eastern Colony, the new University will receive a send-off both hearty and

### THE FRENCH STORE PROSECUTED.

Case Dissmised on Technicalities.

At the Magistracy this morning before Mr Melbourne a case was heard in which the proprietor of the French Store, Queen's. Road Central, was the defendant, the charge against him being that he or his agents refused to sell to Inspector Withers a b tile of brandy, contrary to the provisions of the Fool and Drugs Ordinance. Mr Goldring defended:

Inspector Withers said at 4 p.m. on May 29 he went to the French Store and told an assistant that he wished to purchase bottle of brandy. The assistant, named Wong, asked what kind he wanted, and he said a cheap brand. Wong took witness along the counter and witness pointed to a buttle in a rack with others. Wong took it down and asked Mr Silva, who was sitting at the desk, the price of it and he replied that it was \$3. Witness turned found and then "Silva rushed across the shop, took the bottle from Wong and said "Oh no; we don't sell this kind of brandy." He added that it was not used for drinking but for massage. Witness said he did not suppose the brandy was good and Silva said "You cannot buy it, I will we export it." Witness said he would take the bottle with him, and Silva said if he did he would have to take it by force. Wit-- We are still awaiting them, and we ness told him there would probably be

### THE PORT OF LONDON STRIKE.

### MORE TALK OF A NATIONAL STRIKE.

(Reuter's Service to the China Mail.) LONDON, June 7.

A" gloomier view of the strike was Jaken last night, and there were indica. -tions that the answer of the employers to the proposals of the Government would be unfavourable.

-Mr Gosling, in a message to the Lightermen's Union, said that if the easily, masters did not reply to-day, or if the reply was unfavourable, a national strike would be declared immediately.

The success of such a movement however, is considered doubtful in view of the attitude of the seamen.

It appears that the employers maintain that a federation in their interest would be impracticable.
